

Western Energy Technology Pte Ltd

Specializes In Fire Pump Packages

For over 14 years, WET has been focus on providing complete engineered Fire Pumps Systems and equipment to industries in the region. Every of WET Fire Pump and System Package is specially designed, engineered and produced individually to meet customers' requirements, specifications and the requirements of NFPA20.

The company has recently strengthens its fire pump operations with the establishment of alliance partners with Peerless Pump, a well known Fire Pump manufacturer and packager in USA, Indianapolis; and Shanghai Pudong Special Fire-Fighting Equipment Works, a well known Fire Equipment manufacturer and packager in Shanghai, China.

Peerless Pump has over 80 years of experience and well recognized leader in the fire pump industry. Thousands of Peerless Pump installations (UL, ULC or FM approved) deliver superior fire protection to facilities worldwide.

Shanghai Pudong Special Fire-Fighting Equipment Works is well known and respectable in China for their fire protection equipment. Its products include fire pump package, foam monitor, foam proportioning unit and fire-fighting monitor.

Accredited with ISO 9001 Certification, WET guarantees that the products and services supplied meet the high quality levels in materials, construction and workmanship.

WET fire pump department, staffed with experienced and qualified personnel, has been offering complete service, from engineering assistance to design and fabrication to field start-up. It can design and build anything from simple skid mounted pump, basic electrical motor units to diesel engine driven package with controller, battery or air start system, other accessories and meeting the most stringent offshore specification.

Build on Peerless experiences, WET is today a well recognized leader in fire pump industry. Over these years, contractors, engineers and end-users who recognize the critical nature of fire protection have chosen WET to package the complete fire pumps and systems for reliability, dependability and "Total Unit Responsibility".
